EMPLOYMENT

Software Engineer	Tata Consultancy Services	Jan 2021 – Present
<ul style="list-style-type: none">• Develop applications using Python to interface with existing services from AWS, FireEye, Palo Alto Networks, and more.• Built 8 applications end-to-end and worked in other applications assisting in development.• Write unit tests with Pytest to ensure integrations with other services function as expected.		
Undergrad Research Assistant	Arizona State University	Jun 2019 – Dec 2019
<ul style="list-style-type: none">• Worked in R and Python to develop statistical models and perform analysis on data provided by the University Provost Office.• Documented trends in STEM recruitment and retention at ASU by creating a research paper using LaTeX.		
S.I. Leader	Arizona State University	Jan 2019 – Dec 2019
<ul style="list-style-type: none">• Lead three one-hour long group tutoring sessions for Differential Equations on course-based study strategies ranging from 5 – 25 students.• Collaborated with faculty to identify material that students may be having a hard time understanding to develop study strategies for greater student success.• Created lesson plans for group study sessions before exams to articulate the course material in an efficient manner.		

TECHNICAL EXPERIENCE

-
- **Open Source - MDN Web Docs:** Actively contributed to MDN Web Docs on GitHub from Oct 2020 – Jan 2021. Completed 31 merged PRs in mdn/yari, and 17 merged PRs in mdn/content. Featured in the [contributor spotlight](#) on MDN website.
 - **Metadata Generator:** Developed an Eleventy plugin with JavaScript that generates document metadata for the <head> of a webpage containing: Open Graph, Twitter card, generic meta tags, CSS, JS, custom tags, and a canonical link. Plugin is published on npm and currently has 180+ users.
 - **Markdown Parser:** Developed a Markdown parser for single files or a directory of files using C++.
 - **Eleventy Photo Gallery:** Created a responsive image gallery site template using the Eleventy static site generator. Responsive images are dynamically generated with Node.js at build time.
 - **Bug Saves the World:** Developed a single-player platformer game with JavaScript using Phaser. The objective is to collect all the stars on each level without taking damage.
